Use-Case Specification 27: Logout

1. Log out of the System

1.1 Brief Description

All users will have the ability to log out of the system after logging in.

2. Flow of Events

2.1 Basic Flow

1) General Actor clicks on the logout button on the current page.

2) System presents a pop-up window confirming choice to log out.
The system presents the following message in a pop-up window:

"Are you sure you want to log out?"

The pop-up window also contains two buttons at the bottom; "OK" and "Cancel"

3) General Actor selects "OK" to continue log out.

The General Actor clicks on the "OK" button to log out of the system.

4) System displays the logout confirmation page.

The system displays a page with the following message to the user after the eZ-Audit Logout title:

"Thank you for using eZ-Audit, you have been logged out."

There is a clickable link returning the user to the Login and Welcome page:

"Click here to log back in."

2.2 Alternative Flows

2.2.1 User chooses not to log out once prompted.

Steps 1-2 are the same for the alternate flow. Only the following steps will change.
3) General Actor selects "Cancel" to abort log out.

The General Actor clicks on the "Cancel" button to stop logging out of the system.

4) System displays the original page.

The system displays the page of origin where the user clicked "Logout."

3. Special Requirements

No special requirements for this use case.

4. Preconditions

4.1 Resolution User accesses logout functionality from any page.

A resolution user will be able to logout from any page. See extension point – Use Case 15 "Select an Institution" for information on navigation allowed.

5. Postconditions

5.1 User is logged out

The user must log back into the system to perform any further tasks.

6. Extension Points

6.1 Use Case 15 "Select an Institution"

Describes the home page of the resolution user.

7. Requirements
